

# **SEDAR® Subscriber Update**

**October 9, 2018**

## **Code Update (Version 008.060.001)**

A SEDAR code update is scheduled for October 13, 2018.

You are encouraged to obtain the code update as soon as possible on or after October 15, 2018 by following these procedures:

1. Start the SEDAR program;
2. Select File menu; and
3. From the File menu, select Receive items from SEDAR server.

This method will help make sure that the application is updated and ready for your use before you actually have to perform any business functions.

This code update will bring the SEDAR client application up to version 008.060.001.

Once the code update has been downloaded, close the SEDAR program and follow the instructions below to execute the code update:

1. Click the Start button located at the bottom left corner of the screen;
2. Select Programs; and
3. From the Program menu, select SEDAR and then select Code Update.

## **TMP Filings**

All filings that have been saved but not submitted (shown as TMP on your Filing Management screen) should be either submitted by October 12, 2018 or deleted. To delete any TMP filings, highlight the project and select File/ Remove Unsubmitted Filing(s).

# Summary of Code Update Changes

## Windows 10 Updates / Checkpoint VPN Incompatibility

As noted in the March 5, 2018 subscriber update, Microsoft is currently rolling out releases to upgrade Windows 10 and a component of SEDAR Checkpoint was identified to conflict with these Windows 10 upgrades. This SEDAR release implements code changes to fix previously identified issues with Windows 10. Should you experience issues related to a new Windows 10 upgrade, you will need to reinstall all components of SEDAR, however, for any subsequent issues, you will be able to download and install only SEDAR Checkpoint.

## Updated SEDAR installation package

The SEDAR software installation package has been updated to provide one set of installation files regardless of Windows operating system; users will be prompted during the installation process to identify their operating system. However, each major component of SEDAR can be downloaded separately to allow for easier re-installation, if required, as part of resolving a subscriber's technical issue.

Windows Vista is no longer supported by Microsoft and has been removed from the SEDAR installation package. CSA will continue to provide support on a best efforts basis to users having SEDAR installed on Windows Vista.

To download the new installation package or any of its components, visit the SEDAR Release tab located on our website [www.SEDAR.com](http://www.SEDAR.com). Instructions on how to install SEDAR will be provided in the updated SEDAR Client Installation Guide.
